**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 14 -16 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior arts Song, Ashizawa et al, and Moon fails to teach a method of adjusting a common voltage for an active matrix liquid crystal display device, the liquid crystal display device including a first substrate including a plurality of pixel electrodes arranged in matrix form, a plurality of thin film transistors having a gate electrode and a source electrode, a plurality of data lines transmitting data signals to the source electrode, and a plurality of gate lines transmitting gate signals to the gate electrode from a first end to a second end thereof; a second substrate opposing to the first substrate, the second substrate having a common electrode facing the plurality of pixel electrodes of the first substrate; a liquid crystal layer between the first and second substrates; a gate line driving circuit transmitting gate signals to the first ends of the plurality of gate lines; and a data line driving circuit transmitting data signals to the plurality of data lines, the method, comprising: applying a constant current to the common electrode through a second connection point having a second contact resistance at a position corresponding to the first end of the plurality of gate lines; and applying a common voltage to the common electrode through a first connection point having a first contact resistance at a position corresponding to the second end of the plurality of gate lines as claimed in Claim 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
